

Ebook Addon

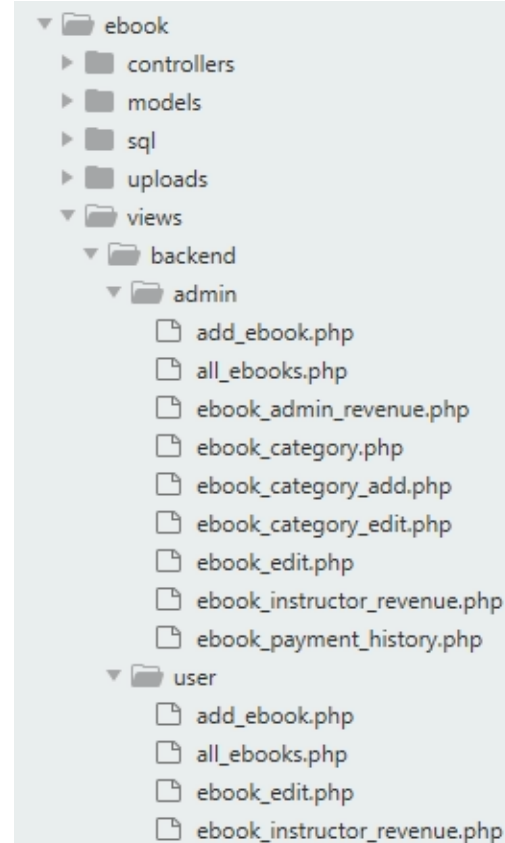

Academy LMS

Developer Guide

Copyright 2022 Creativeitem. All rights reserved.

Source Code Structure:

We followed standard MVC structure within powerful Php Codeigniter framework to develop Ebook Addon.

Structure of Ebook addon:

Controllers

- **Ebook.php**: This is the controller we used for frontend functionalities. As the name suggests, it controls all the functions.
- **Ebook_manager.php**: This is the controller we used for backend functionalities. As the name suggests, it controls all the functions.

Models

- **Ebook_model.php**: All the functionalities related to the database are done here.

SQL

- **updater.php**: If an addon requires modifications on the existing database this file comes to play the role.

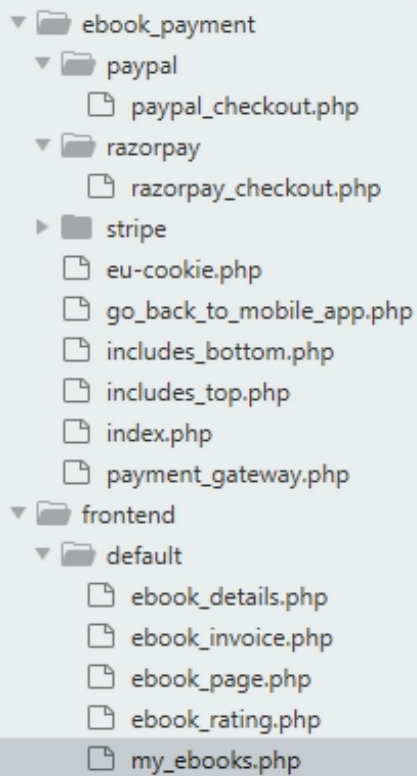

Views

Backend

- **add_ebook.php**
- **all_ebooks.php**
- **ebook_admin_revenue.php**
- **ebook_category.php**
- **ebook_category_add.php**
- **ebook_category_edit.php**
- **Ebook_edit.php**
- **Ebook_instructor_revenue.php**
- **ebook_payment_history.php**

Frontend

- **ebook_details.php**
- **ebook_invoice.php**
- **ebook_page.php**

- **ebook_rating.php**
- **my_ebooks.php**

Payment

- We have used a separate payment page for this addon.

: These are the view files we used for this addon.

Config.json: This is the skeleton of an addon. It contains the core data. It also describes all the actions made during installation. So do not change anything here.
